perplexity

based on it made code and i want to output in here

You can share the portfolio website code in this chat by copying and pasting the contents directly—just use triple backticks (```) at the beginning and end of your code blocks for proper formatting. If you have HTML, CSS, or JavaScript files from your project, paste each separately in this format[web:25][web:37].

Example of How to Post Code Here

```
<!-- index.html -->
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8" />
    <title>Portfolio</title>
    <link rel="stylesheet" href="css/style.css" />
</head>
<body>
    <!-- Your HTML content here -->
</body>
</html>
```

```
/* css/style.css */
body {
    font-family: Arial, sans-serif;
}
```

```
// js/script.js
console.log("Portfolio script loaded.");
```

Paste your actual code within these blocks, and it will be easy to read and debug. If you want feedback or help fixing something, just copy your code in this way and describe what you need help with[web:25][web:37].
